PROFESSIONAL SUMMARY

Software engineer with 2+ years shipping customer-facing SaaS features end to end — React/Next.js and TypeScript on the frontend, C#/.NET services and PostgreSQL on the backend — with a focus on component architecture, state management, API design, and performance. Comfortable owning a feature from UI through service layer and iterating fast on polished UX. Daily practitioner of AI-assisted development, using Claude Code and Codex to accelerate delivery without compromising code quality.

WORK EXPERIENCE

Full Stack Developer, GAINSERV Infotech Pvt. Ltd.

Sep 2024 – Present

- Develop the company's multi-tenant SaaS dashboard in Next.js (App Router, React 19, Tailwind CSS) — feature modules spanning billing, single sign-on, integrations, and team/role management — with Auth.js/OIDC session handling and protected routes enforced via edge middleware.
- Built and maintain a shared React component library with design tokens powering the product apps in an Nx monorepo, plus a Next.js design-system documentation site, replacing duplicated per-app UI code and speeding up cross-team feature delivery.
- Improved performance on data-heavy screens using TanStack Query caching and request deduplication, eliminating redundant API calls and speeding up load times measured via Lighthouse and Core Web Vitals.
- Integrated REST and GraphQL APIs with robust loading, error, and cache-invalidation handling across the product apps.
- Developed backend features in C#/.NET with PostgreSQL — including two-way login isolation between the admin panel and tenant dashboard via OpenIddict authorization guards — owning features from API design through frontend integration.
- Maintained Azure DevOps CI/CD pipelines for the product apps; diagnosed and resolved 20+ production issues with no repeat incidents.

Web Development Intern, GAINSERV Infotech Pvt. Ltd.

Mar 2024 – Sep 2024

- Built 20+ reusable React components and UI patterns adopted as the team's standard building blocks.
- Authored frontend architecture and onboarding documentation for the monorepo codebase.

PROJECTS

Chronos 3D Watch Configurator — chronos-3d.vercel.app | github.com/robravi/chronos-3d

- Real-time 3D luxury watch configurator: fully procedural Three.js/React Three Fiber watch (0 KB of 3D assets), 6,552 shareable URL-driven configurations, and cinematic per-part camera work in Next.js 16 — with pricing server-verified by an ASP.NET Core (.NET 10) API on Azure, deployed via GitHub Actions CI/CD.

AI Resume Analyzer — ai-analyzer-neon-omega.vercel.app | github.com/robravi/Ai-analyzer

- Full-stack AI resume analyzer: upload a resume, get real-time AI feedback on skill gaps and ATS compatibility. Next.js SSR + Llama 3.3 70B via Groq for low-latency inference. Lighthouse performance 94 (mobile) / 100 (desktop), zero layout shift.

E-Commerce App — e-commerceapi-taupe.vercel.app | github.com/robravi/e-Commerce

- E-commerce app with faceted filters, cart, and checkout. Route-based code splitting and a responsive, WCAG-compliant UI.

SKILLS

Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, Zustand, TanStack Query, REST, GraphQL

Languages: TypeScript, JavaScript (ES6+), C#, HTML5, CSS3

Backend: .NET, Node.js, Express.js

Databases & Messaging: PostgreSQL, ClickHouse, Redis, RabbitMQ/Bull Queue

AI Development Tools: Claude Code, OpenAI Codex — agentic coding, code review, test generation, refactoring workflows

Tools & Platforms: Azure DevOps (CI/CD), Docker, Git, Nx, Turborepo, Jest, Vitest, RTL

Spoken Languages: English (Professional), Hindi (Native)

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

Bachelor of Technology (B.Tech), Electrical & Electronics Engineering
