SUMMARY

Full Stack Developer with 2+ years shipping customer-facing SaaS features end-to-end - React/Next.js frontends, C#/.NET services, PostgreSQL, and CI/CD with GitHub Actions and Azure DevOps. Own features from component architecture and state management through API design and deployment. Ship daily with agentic AI tooling inside a standard review-and-test workflow.

SKILLS

Languages: TypeScript, JavaScript (ES6+), C#, HTML5, CSS3

Frontend: React.js, Next.js, Angular, Tailwind CSS, TanStack Query, Zustand, Redux Toolkit, Responsive Design, WCAG Accessibility

Backend: .NET, Node.js, Express.js, REST, GraphQL

Data & Messaging: PostgreSQL, Redis, RabbitMQ/Bull Queue

Testing: Jest, Vitest, React Testing Library, xUnit

Tools & Platforms: Azure DevOps (CI/CD), GitHub Actions, Docker, Git, Nx, Claude Code, Codex

Spoken Languages: English (Professional), Hindi (Native)

EXPERIENCE

Full Stack Developer, GAINSERV Infotech Pvt. Ltd., Surat, India — Sep 2024 - Present

- Own feature modules - billing, SSO, integrations, and team/role management - in the company's multi-tenant Next.js SaaS dashboard (App Router, React 19, Tailwind CSS).
- Architect Auth.js/OIDC session handling with protected routes enforced at edge middleware, plus two-way login isolation between the admin panel and tenant dashboard via OpenIddict authorization guards.
- Build and maintain a shared React component library with design tokens, consumed by the product apps in an Nx monorepo, alongside a Next.js design-system documentation site - replacing duplicated per-app UI code and speeding up cross-team feature delivery.
- Eliminate redundant API calls on data-heavy screens using TanStack Query caching and request deduplication, improving load times tracked through Lighthouse and Core Web Vitals.
- Design and ship C#/.NET REST APIs over PostgreSQL, integrating GraphQL endpoints and async job workflows (Redis, RabbitMQ/Bull Queue) that power AI-driven product features.
- Own the BYOK (bring-your-own-key) AI configuration module in the Angular admin panel - a lazy-loaded standalone component with reactive forms, RxJS debounced search, and paginated provider/model catalogs behind policy-guarded routes.
- Build and maintain CI/CD pipelines for the product apps across GitHub Actions and Azure DevOps, and own production triage across the frontend and backend from diagnosis through to the deployed fix.

Web Development Intern, GAINSERV Infotech Pvt. Ltd., Surat, India — Mar 2024 - Sep 2024

- Built 20+ reusable React components and UI patterns adopted as the team's standard building blocks.
- Authored frontend architecture and onboarding documentation for the monorepo codebase.

PROJECTS

Chronos 3D Watch Configurator - chronos-3d.vercel.app | github.com/robravi/chronos-3d

- Real-time 3D watch configurator built with 0 KB of 3D assets - a fully procedural model in Next.js 16 + React Three Fiber, with 6,552 shareable URL-driven configurations.
- Server-authoritative pricing in an ASP.NET Core (.NET 10) API on Azure, with xUnit-tested config validation and GitHub Actions CI/CD.

AI Resume Analyzer - ai-analyzer-neon-omega.vercel.app | github.com/robravi/Ai-analyzer

- Upload a resume, get real-time AI feedback on skill gaps and ATS compatibility. Next.js SSR with Llama 3.3 70B via Groq for low-latency inference.
- Lighthouse performance 94 (mobile) / 100 (desktop), zero cumulative layout shift.
